

Name of the Practice: A Techno Fest by tech-savvy students

Objectives of the Practice

Technology, which basically refers to bringing together tools that ease creation, use and exchange of information, has a major goal of making tasks easier to execute as well as solving many mankind's problems. As technology continues to advance and direct even more easiness in our lives, there is a need to stress how advantageous it has been to our lives. To awareness about science and technology, a techno workshop has been organized by the Department of Computer Science of St. Vincent Pallotti College, Kapa, Raipur. The theme of workshop was "**TechnoBuzz - A Techno Workshop by Tech Savvy Students**", where all the students of various department have participated actively and revealed their talent with their innovative ideas.

The Context

Different models from various departments like Arduino Cell Phone, 3D Hologram Pyramid, Smart city, mini projector, fire alarm and many more were presented. Students of all the departments visited the models and encouraged the students for their innovative ideas. Students of Holy Cross Senior Secondary School, Kapa were also visited the techno workshop.

The Practice

Students taught, responded enthusiastically and learnt how to read and write better and also they are very willing to complete the extra assignments allotted.

Evidence of Success

Students taught, responded enthusiastically and learnt how to read and write better and also they are very willing to complete the extra assignments allotted.

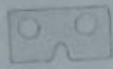

Problems encountered and resources required:

Students of St. Vincent Pallotti College need some extra resources like equipments, materials and financial support for such projects.

They also need some extra attention of teachers for development of such kind of project.

TECHNO WORKSHOP

Cardboard V.R.

Material Used

- Some Cardboard
- 2mm thick, 10cm long
- Acrylic

About Content provided by google

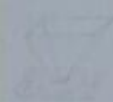

It is all done by
group of students
with the help of
Special team of **Virtual Reality**

By: *[Handwritten names]*

Techno 2016-17

Workshop

3D Hologram Projector.

About Project

Many Collection of 3D
with the help of
students, with the help
of 2D picture 3D view

Material Used

- Size of box (10x10x10)
- Acrylic
- Cardboard
