

Title of the practice: Remedial Classes

Objectives of the Practice

1. The aim of RT is to provide learning support to pupils who lag far behind their counterparts in school performance.
2. A remedial activity is one that is meant to improve a learning skill or rectify a problem area. Remedial instruction involves using individualized teaching of students who are experiencing difficulties in specific subject areas.
3. To cultivate an atmosphere of sharing of knowledge among the Students.
4. Reinforcement: Students who have been out of college may benefit from remedial teaching over a week or more to reinforce skills they lost due to extended time away from college.
5. Diverse methods and materials are used in remedial teaching, with which new ways can be found to approach the subject that is to be learned.
6. To develop pupils' generic skills, including interpersonal relationship, communication, problem-solving, self-management, self-learning, independent thinking, creativity and the use of information technology.
7. To facilitate learning and development among all.

The context

St. Vincent Pallotti College has a number of departments and have skilled and experienced faculties. The Commerce & Management department conducts remedial classes for the weak students in order to facilitate them with basic learning skills & knowledge. Remedial education (also known as developmental education, basic skills education, compensatory education, preparatory education,

and academic upgrading) is assigned to assist students in order to achieve expected competencies in core academic skills such as literacy and numeracy. Students who have temporarily fallen behind in their studies or otherwise need short-term support in their learning have the right to get remedial teaching.

The Practice

In this practice the teachers take their topic remedial class according to the scheduled time table. The departmental head prepares the schedule of the remedial classes.

Evidence of Success

The ultimate aim of remedial classes or teaching was to provide special attention to the students who fall or lag behind studies. And all the students were benefitted with this special course and hence their academic score was improved which ultimately resulted in the growth of the institute & students too.

Problems encountered and resources required: As all things have their pros and cons therefore remedial classes also encounter some problems. These problems were not major and got resolved immediately. Some problems that were encountered were:

- Time constraint: many times the topics were interesting and audience wants to listen but due to the time the classes were cut down short.
- Delayed feedback from the instructor.
- Lack of self regulation & self motivation.
- Sense of isolation caused by the interpersonal communication & interaction among students or between the students & the instructor, or caused by the use of monotonous instructional methods.
